EDUCATION

Bachelors in Information Technology

AIR UNIVERSITY ISLAMABAD

2022-2026

INTERMEDIATE

Punjab College || Rawalpindi

2020-2022

MATRICULATION

Bahria Foundation School ||

Rawalpindi

2010-2020

TECHNICAL SKILLS

- Python
- React
- Typescript
- JavaScript
- LanGraph
- LangChain
- FastAPI
- SQL
- N8N
- Redis
- Pinecone
- Weaviate

SOFT SKILLS

- Leadership
- Management
- Teamwork
- Problem Solver

INTERESTS

- Social work
- Exploring new things
- Tourism and capturing nature
- MotorSports
- Prompt Engineering

CAREER OBJECTIVE

Fresh BSIT Graduate from Air University (2022-26) focused on Python development, Agentic AI, and fullstack systems. Built projects including a multi-agent contract analysis engine (RAG with Pinecone/Weaviate, FastAPI, PostgreSQL, Redis, Docker, automated tests) and a Solana-based FundChain platform. seeking Python/AI developer roles to deliver scalable, secure automation and agentic AI solutions

WORK EXPERIENCE

- 6 weeks Web Development Internship at MeliorITS

PROJECTS

- **Intelligent Contract Analysis & Compliance Engine: | Personal Project**
Architected a multi-agent AI system using LangGraph to orchestrate 6 specialized agents for automated contract clause extraction, risk scoring, and compliance validation (GDPR, HIPAA, SOX, CCPA). Built RAG pipelines with Pinecone and Weaviate vector databases to ground LLM outputs in relevant contract history and regulatory rules. Developed a FastAPI backend with PostgreSQL, Redis, and Celery for async background processing, alongside a React/TypeScript frontend dashboard. Automated external workflows by integrating n8n with DocuSign (e-signature webhooks) and Salesforce (CRM sync). Containerized the full stack (5 services) with Docker Compose and achieved 100% pass rate across 41 automated tests using pytest
<https://github.com/Muhammad-Aashir-web/-Intelligent-Contract-Analysis-Compliance-Engine.git>
- **FundChain - Secure Business Investment Platform on Solana: | Final Year Project**
Architected a full-stack blockchain investment platform on Solana using React, Supabase, FastAPI, and Rust (Anchor). Developed an on-chain escrow system for secure milestone-based fundraising and automated fund release/refunds. Integrated a FastAPI AI microservice using scikit-learn for plagiarism detection, wallet-risk analysis, and fraud scoring. Implemented tiered KYC verification, Phantom Wallet authentication, and an OpenRouter GPT-powered support chatbot. Secured data with PostgreSQL Row-Level Security policies and deployed the platform across Vercel, Supabase, and Render with CI/CD. Validated production readiness through comprehensive testing, achieving 143 ms average API response time and 98.6% success rate under peak load.

EXTRA CURRICULAR

Member of MICROSOFT LEARN STUDENT AMBASSADOR(MLSA 2024-26)

I have played my role in the operations team in organizing and managing different tech events in MLSA and gained much knowledge and exposure through the program.

MEMBER OF AIR UNIVERSITY COMPUTING AND INNOVATION SOCIETY (AUCIS 2023)

I have worked in management teams as leads in AUCIS.

CERTIFICATIONS

- Microsoft Office Specialist: Word Associate (Microsoft, 2021).
- Certificate of Participation– FYP Open House 2026 (AIR University).
- Coursera Certification of AWS S3 basics .
- Certified in n8n Community Level 1 with official badge.
